Royal London Sustainable Short Duration Corporate Bond Fund

Quarterly Investment Report

30 June 2024

Quarterly Report

The fund as at 30 June 2024

The purpose of this report is to provide an update on the Royal London Sustainable Short Duration Corporate Bond Fund. The report has been produced by Royal London Asset Management. The report starts with a summary dashboard showing key information about the fund. A glossary is located at the end of the report covering the description of some of the more technical terms used within the report. All data is as at the report date unless otherwise stated.

Contents

ROYAL LONDON
ASSET MANAGEMENT

The fund

Fund performance objective and benchmark

The Fund's investment objective is to achieve a total return over the medium term, which should be considered as a period of 3-5 years, by predominantly investing in sterling-denominated corporate bonds, which will primarily be short-duration (5 years or less). Investments in the Fund will adhere to the Investment Manager's ethical and sustainable investment policy. The Fund's performance target is to outperform the ICE Bank of America Merrill Lynch Sterling Non-Gilt (1-5 Years) Total Return (GBP Unhedged) Index (the "Index"), after the deduction of charges, over rolling 5-year periods. The IA Sterling Corporate Bond sector is considered an appropriate benchmark for performance comparison.

Benchmark: ICE BofA 1-5 Year Sterling Non-Gilt Index

Performance commentary

Our credit-only fund Sustainable Short Duration Corporate Bond fund produced a positive absolute return for the quarter, ahead of the benchmark index. The main driver of positive performance was stock positioning – notably in the bank sector. The additional carry built into the portfolio over the benchmark index was also helpful.

Within the banking sector, our exposure to subordinated bonds remained helpful as holdings in OSB, Santander and Lloyds Banking Group all performed well.

News flow continues on the water sector as the regulator's draft decision on spending over the next five years was deferred as a result of the snap election being called. While the commentary on the sector remains febrile, there have been no real developments that require portfolio positioning to be changed, and we continue to support the funding of this critical sector.

Fund activity

New issue activity provided numerous opportunities for the fund over the quarter. Financials continued to dominate primary market activity We added AT1 bonds from Coventry Building Society yielding over 9%. We also added a new tier 2 issue from asset manager Schroders, issued with a yield of over 6%. In the insurance sector, we added a new issue from US insurer Protective Life. These bonds rank alongside policyholders, offering strong downside protection and were attractively priced at a yield of over 5%.

The secondary market was also a source of trades during the quarter. We took profits on senior OSB bonds after strong performance, and added Virgin Money AT1s, with the proposed takeover offering the opportunity to buy Nationwide risk at Virgin Money yields. We also took profits on Aviva bonds, switching in AXA for an attractive increase in credit spread.

In the structured area, a key component of the portfolio, we continue to believe that the additional security and covenants are underpriced by the wider market. During the quarter, we added a new issue from Vantage Data Centers Jersey, a securitisation of real estate and tenant lease payments from two operating wholesale data centres in Newport. This deal offered a low to value (LTV) and pays an attractive credit spread. We also bought a new issue from UK Logistics – a commercial mortgage-backed security FRN, backed by a portfolio of logistics assets mainly in the Greater Manchester area with an attractive loan to value ratio and AAA rating. The assets, which are positioned in a close proximity to urban centres, allow SMEs to reduce their direct emissions as well as transportation costs thanks to being closer to end customers.. In more familiar names, we added a new issue from the AA – these bonds secured on the business and paying an all-in yield of around 7%, with the issuer also tendering for their shorter dated bonds at a premium to market pricing. The fund also added a new issue from PCL funding, who provide financing for lump sum insurance, professional fees, and school fees. Finally, we bought a new issue RMBS, Exmoor Funding, secured on a portfolio of mortgages from specialist mortgage provider LiveMore, which focuses on lending to later life borrowers (50 to 90+ age group) – promoting financial inclusion for a segment of the UK population underserved by traditional high street lenders. In the secondary market, we bought a commercial mortgage-backed security from Meadowhall Finance, secured on the Sheffield shopping centre; the bonds enjoy a low LTV and pay almost 300bps over equivalent gilts – a significant premium to market levels.

Characteristics and climate

ESG characteristics rationale

The Fund focuses on the sustainability of the products and services of the companies it invests in, as well as their standards of environmental, social, governance ("ESG") management, alongside financial analysis. The investment approach is fundamentally based on positive screening; identifying companies that are making a positive contribution towards a cleaner, healthier, safer and more inclusive society, through assessing both what a company does and how it does it, and through active engagement to encourage continual improvement. The fund will not invest in companies that undertake business activities deemed to be detrimental to society. Further details of the Funds Sustainable Investment process can be found in the ethical and sustainable investment policy at www.rlam.com

Fund Engagement

Engagement definition

Engagement is active dialogue with investee companies (or other entities). There are two types: engagement for information, which is dialogue as part of investment research or ongoing monitoring, without specific objectives for change, and engagement for change, which is purposeful dialogue to influence positive change, with defined objectives and demonstrable outcomes.

Engagements

Engagement activity	Fund 3 months	Fund 12 months
Number of entities engaged	4	21
Number of engagements	8	48

This is an estimate. Some engagements at the issuer level may not have been attributed to the specific bond held in the fund, resulting in a lower number of engagement activities.

Total engagements by theme and topic

Climate	**3**
Climate - Transition Risk	3
Governance	**2**
Corporate Governance	1
Remuneration	1
Social & Financial Inclusion	**2**
Just transition	2
Technology, Innovation & Society	**2**
Technology & Society	2

The numbers of engagements and themes/topics discussed may differ where a single engagement covers multiple themes/topics.

Engagement focus

Firm-wide engagement activity is centred around six themes which we have identified in consultation with our clients. These are: climate change; nature and biodiversity; health; governance and corporate culture; social and financial inclusion; innovation, technology and society. Portfolio level engagements are not thematic and are focussed on issues specific to managing the portfolio and meeting the investment objective.

Engagement data represents all engagements undertaken at both firm and portfolio level across Royal London Asset Management, and may not be limited to those undertaken solely for the purpose of managing the fund.

Fund Engagement

Engagement outcomes

BNP Paribas SA – Net zero

Purpose:

We, as part of a collaborative investor group coordinated by ShareAction, asked a question at BNP Paribas' AGM regarding its financing of oil and gas companies.

Outcome:

The CEO of BNP Paribas has expressed confidence in the bank's decision to cease involvement in oil and gas bond transactions since mid-February 2023. This move is indicative of the bank's disinterest in participating in oil and gas bonds and is seen as a positive step. BNP Paribas utilises International Energy Agency scenarios as a guide and seeks to reflect its insights in its policies. During our meeting, the CEO reaffirmed the bank's commitments, including its 10-90 goal, which aims for 90% of its energy sector financing to be low carbon, with the remainder for fossil fuels, contingent on suitable opportunities for financing. We will continue to monitor BNP's disclosures and assess the company's progress.

NatWest Group Plc – Just transition

Purpose:

At the 2024 Annual General Meeting, in partnership with Border to Coast and Friend Provident Foundation, we posed a question regarding the company's commitment to integrating the principles of a just transition within its climate transition plan.

Outcome:

The Chair responded that NatWest is determined to be a leading bank on sustainability in general and just transition specifically. The Chair believes that the bank understands the need for a just transition and continues to consider how it can integrate it into its climate plan and sustainability regularly. The bank's current climate transition approach has been informed by best practice guidance, and it uses partnerships to put into practice some of the principles of a just transition. We appreciated the Chair's response to our question, yet the answer did not provide any commitments beyond what we have discussed with the company in private meetings. We have recently published investor expectations for banks on just transition and we will look to use this to continue our engagement with the bank.

Fund Engagement

Engagement outcomes

Vodafone – Ethical AI

Purpose:

We have reached out to Vodafone on behalf of the Investor Group as part of the World Benchmarking Alliance's Ethical AI collaborative engagement. Our aim is to schedule a meeting with the company to gain a deeper understanding of its ethical AI practices and to discuss opportunities for enhancing these practices.

Outcome:

Vodafone has provided a written response outlining its AI governance structure, highlighting the AI Governance Board's role in strategy and policy oversight, chaired by the Chief Commercial Officer and comprising senior executives such as the CEO of Vodafone Business and the Chief Technology Officer. The AI framework emphasises a responsible approach to AI, with a focus on ethical principles and risk management across the AI lifecycle. The company is proactive in human rights due diligence and is enhancing risk assessments to address AI risks effectively with a particular focus on establishing robust controls during the design phase. We continue to seek a detailed dialogue on its ethical AI practices.

Market commentary

Market overview

Markets have once again been dominated by interest rates during the quarter, despite little or no movement in this area. 2024 started with expectations that central banks would cut early and cut often. However, as the year has progressed, those expectations have changed. Inflation has generally not come down quite as fast as hoped, with services inflation proving sticky, particularly in the UK, while growth has generally not been as weak as feared – particularly in the US. Interest rates were cut just once across the Federal Reserve, European Central Bank and Bank of England, with the ECB cutting rates in June. Most central bank forecasters now only expect one or two cuts from each of these banks over the course of 2024 as a whole.

Ahead of the US Presidential elections in November, snap parliamentary elections were called in the UK and France, providing reminders that voter dissatisfaction with the seeming consensus on economic policy and ongoing lack of consensus on longer-term issues such as climate change create an uncertain backdrop for businesses and consumers alike.

Data released in the UK in the second quarter confirmed that the country bounced out of technical recession in the Q1 and painted a picture of continued positive economic growth. Meanwhile inflation also dropped back to the Bank of England's 2% target. The rate of change in the CPI basket fell from 3.4% year-on-year in February to 2.0% in May, helped by lower electricity and gas bills. The Bank of England kept rates at 5.25%, even though headline inflation dropped. This reflected concern about services inflation and pay growth, both of which remain elevated. The calling of UK general election, which has resulted in a change of government, had minor impact on sterling asset prices, reflecting a view that there would be little shift in economic policy.

Government yields generally rose over the quarter, particularly following poor US inflation data released in April with yields largely range-bound through May and June. In the US, 10-year treasury yields rose from 4.21% to 4.40%, while German 10-year bunds similarly saw yields rise from 2.30% to 2.50%. Benchmark 10-year gilt yields rose from 3.94% to 4.18%.

The sterling investment grade credit market (iBoxx non-gilt index) returned -0.13% over the quarter, with the average sterling investment grade credit spread (the average extra yield available from non-gilt bonds compared with government debt of equal maturity) widening marginally from 1.02% to 1.03% (iBoxx). Given the modest rise in yields, sectors with a greater proportion of long-dated bonds performed less well, including utilities and social housing. Of the major sectors, supranationals and banks produced positive returns, while insurance lagged.

Outlook

All issuers within our sustainable holdings offer a net benefit to society or show ESG leadership. As well as reducing risk, we seek out opportunities that are under-researched e.g., bonds that do not fall into mainstream indices or benchmarks and/or are unrated by ratings agencies. Importantly, the sustainable credit proposition provides access to critical sectors that most investors can't access via equity markets. Key themes in the funds include social housing, social & environmental infrastructure, community funding (regulated banks and building societies focused on SME and retail lending), financial inclusion & resilience (such as insurance products to support individuals through shocks) and the energy transition. On sustainability grounds, we have no exposure to bonds of oil & gas companies or extractive industries. We are also underweight in the general industrial and consumer goods sectors, and to a lesser extent in consumer services.

Last quarter we highlighted that we expected yields to remain sensitive to economic data, and unless there was a significant deterioration in underlying trends, we expected this to lead to range-bound yields. This is the scenario that unfolded over the quarter, with markets seeming to mark time until central banks – notably the Federal Reserve – start to cut rates. We expect a small fall in government bond yields in Q3.

Headline inflation is now significantly lower in the US, euro zone and UK compared to 2023. Base effects account for a material part of these falls. Beyond the headline figures, the likes of services inflation and wage growth remain higher than most central bankers would prefer. That said, we do expect to see more movement from central banks in the second half of the year, even if the quantum of those moves is less than many were forecasting earlier in the year.

Sterling investment grade yields are higher than they were at the start of the year, reflecting higher gilt yields and a small reduction in credit spread. We believe that the all-in yield on the market (using iBoxx), near 5.3% at the end of June, is attractive both in absolute terms but also relative to government bonds. Despite the contraction in credit spreads they continue to compensate investors for the risk of default.

We target – and achieve – a material yield premium over the market level in our sterling credit strategies. We mitigate the risks by maintaining highly diversified portfolios, with a bias towards bonds that offer greater security and downside protection. Our view remains that over the medium term our focus on delivering greater income than the benchmark will generate outperformance.

Risks and Warnings

Investment risk

The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Credit risk

Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

EPM techniques risk

The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Interest rate risk

Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital. Unlike the income from a single fixed interest security, the level of income (yield) from a fund is not fixed and may go up and down. Bond yields (and as a consequence bond prices) are determined by market perception as to the appropriate level of yields given the economic background.

Liquidity risk

In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Counterparty risk

The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges from capital risk

Charges are taken from the capital of the Fund. Whilst this increases the yield, it also has the effect of reducing the potential for capital growth.

Responsible investment risk

The Fund can only invest in holdings that demonstrate compliance with certain sustainable indicators or ESG characteristics. This reduces the number securities in which the Fund can invest and there may as a result be occasions where it forgoes more strongly performing investment opportunities, potentially underperforming non-sustainable funds.

Glossary

Asset allocation

Breakdown of the assets by asset classes. Based on RLAM asset classification scheme.

Credit ratings

Credit ratings are based on RLAM composite ratings which uses a hierarchy of S&P, Moody's and then the Fitch rating.

Distribution yield

The distribution yield reflects the amounts that may be expected to be distributed over the next 12 months. It is calculated net of standard management charges. It reflects RLAM's current perception of market conventions around timing of bond cash flows.

Duration

Measure of sensitivity of a Fixed Income instrument to changes in interest rates, indicating the potential impact of interest rate fluctuations on the value of the investment.

Fund analytics

All figures exclude cash. Credit bonds include non-sterling bonds and CDs where held within the fund or benchmark.

This is applicable to the following sections: fund Asset Allocation, Duration, Yield curve, Sector breakdown, Financial holdings, Credit ratings.

Fund value

Total value of the fund as of the last business day of the calendar month. The fund value is as at close of business and on a mid-price basis.

Gross redemption yield

Gross redemption yield is the rate of discount at which a bond's future obligations of interest and capital payments equates to its current price. The gross redemption yield shown for the fund is the average for its individual holdings, weighted by their current value, net of relevant fund management costs and gross of tax.

Number of holdings

Total number of unique holdings of the Fund excluding cash, currency and derivatives.

Number of issuers

Number of unique issuers of all assets held by the Fund, excluding cash, currency and derivatives.

Performance

Performance is calculated using the daily end of day NAV per share produced by HSBC based on the mid price.

Sector breakdown

Breakdown of the fixed income assets, excluding derivatives and cash by RLAM's internal industry sector classification scheme. Figures are subject to rounding.

Top 10 holdings

Top 10 assets held by market value, excluding derivatives and cash.
