Royal London Global Sustainable Equity Fund

Quarterly Investment Report

30 September 2024

Quarterly Report

The fund as at 30 September 2024

The purpose of this report is to provide an update on the Royal London Global Sustainable Equity Fund. The report has been produced by Royal London Asset Management. The report starts with a summary dashboard showing key information about the fund. A glossary is located at the end of the report covering the description of some of the more technical terms used within the report. All data is as at the report date unless otherwise stated.

The fund

Fund performance objective and benchmark

The Fund's investment objective is to achieve capital growth over the medium term, which should be considered as a period of 3-5 years, by predominantly investing globally in the shares of companies listed on stock exchanges that are deemed to make a positive contribution to society. Investments in the Fund will adhere to the Investment Manager's ethical and sustainable investment policy. The Fund's performance target is to outperform, after the deduction of charges, the MSCI All Countries World Net Total Return Index GBP (the "Index") by 2.5% p.a. over rolling 3-year periods.

Benchmark: MSCI All-Countries World Net Total Return Index GBP

Performance commentary

The fund underperformed the benchmark during the third quarter.

The third quarter was volatile for markets. July and August were impacted by Q2 corporate results announcements, followed by September which in itself was a very volatile month. The best performing sectors during the period were real estate and utilities, while energy and information technology underperformed. Real estate and utilities gained on the back of lower interest rates and benefitted from a rotation into more defensive sectors given the uncertain economic growth outlook. Financials have also been positively impacted by interest rates as the yield curve steepened. In the energy sector, the oil price has been on a downward trend overall, partly due to recession concerns. Contrary to expectations, oil supply has remained strong while demand has been disappointing driven by weakness in China. It was also a volatile quarter for the technology sector, with a notable correction in some artificial intelligence related stocks following a strong run in the prior six months.

Latin American e-commerce and fintech provider MercadoLibre was a top contributor to performance during the third quarter as it continues to deliver strong growth and margin expansion. US electrical installation company Comfort Systems also gained, benefiting from data centre investments amid a general shortage of skilled labour in the US.

Pest control and hygiene business Rentokil detracted from performance in Q3. Organic growth in its North American business has disappointed following its acquisition of Terminix, another US pest control company. Another detractor was ASML, a provider of semiconductor manufacturing equipment. The company reported positive quarterly results but was subject to profit taking as one of their customers, Intel, announced capex cuts, potentially impacting near-term orders for its tools.

We have a portfolio exposed to some exciting and powerful multi-year structural growth themes – the key ones being the ongoing digitalisation of society through things such as cloud computing and AI, which we think we're incredibly early in. We also have exposure to companies enabling the development of a more sustainable and resilient physical world. These include areas such as HVAC (heating, ventilation, and air conditioning), building electrification and more sustainable transport such as rail. We also continue to be excited by the opportunities in the healthcare sector where we observe advancements in computing are accelerating new drug discovery combined with large disease categories such as obesity emerging.

Fund activity

Our sustainable strategies are orientated to those companies that have a net benefit to society and create value for investors through their products and services and the way they manage environmental, social and governance (ESG) issues. Areas such as healthcare and technology remain at the core of the equity portfolios, complemented by engineering, utilities, selected financial services, and companies that lead their industries in ESG performance. This means that we do not invest in some sectors, such as oil & gas, extractive industries, or tobacco. We believe that the exposure to those sectors which offer a positive contribution to society is consistent with outperformance over the medium term.

We did not add any new names to the fund in Q3. However, we continued to build our holding in British pharmaceutical company GlaxoSmithKline (GSK) during the quarter. We also added to Rentokil, taking advantage of the share price weakness. We exited our position in IQVIA, a contract research organisation for the pharmaceutical and biotech industry, in favour of better uses of capital elsewhere in the portfolio.

Fund breakdown

Sector weights

Characteristics and climate

ESG characteristics rationale

The Fund focuses on the sustainability of the products and services of the companies it invests in, as well as their standards of environmental, social, governance ("ESG") management, alongside financial analysis. The investment approach is fundamentally based on positive screening; identifying companies that are making a positive contribution towards a cleaner, healthier, safer and more inclusive society, through assessing both what a company does and how it does it, and through active engagement to encourage continual improvement. The fund will not invest in companies that undertake business activities deemed to be detrimental to society. Further details of the Funds Sustainable Investment process can be found in the ethical and sustainable investment policy at www.rlam.com/uk/individual-investors/policies-and-regulatory/

Fund Engagement

Engagement definition

Engagement is active dialogue with investee companies (or other entities). There are two types: engagement for information, which is dialogue as part of investment research or ongoing monitoring, without specific objectives for change, and engagement for change, which is purposeful dialogue to influence positive change, with defined objectives and demonstrable outcomes.

Engagements

Engagement activity	Fund 3 months	Fund 12 months
Number of entities engaged	11	26
Number of engagements	15	53

This is an estimate. Some engagements at the issuer level may not have been attributed to the specific bond held in the fund, resulting in a lower number of engagement activities.

Technology & Society	1

Engagement focus

Firm-wide engagement activity is centred around six themes which we have identified in consultation with our clients. These are: climate change; nature and biodiversity; health; governance and corporate culture; social and financial inclusion; innovation, technology and society. Portfolio level engagements are not thematic and are focussed on issues specific to managing the portfolio and meeting the investment objective.

Engagement data represents all engagements undertaken at both firm and portfolio level across Royal London Asset Management, and may not be limited to those undertaken solely for the purpose of managing the fund.

The numbers of engagements and themes/topics discussed may differ where a single engagement covers multiple themes/topics.

Fund Engagement

Engagement outcomes

SSE Plc - Multi-thematic

Purpose:

We communicated with SSE through a stewardship letter to outline key sustainability issues identified in our recent analysis. The letter aimed to prioritise areas for progress and arrange a meeting for further discussion.

Outcome:

In the area of health and safety, we highlighted that contractor safety had fallen below expected standards and urged SSE to improve performance. On climate issues, we expressed support for SSE's climate approach and voted for its net zero transition report at the latest AGM, while recommending a more detailed Scope 3 emission reduction plan and alignment of thermal generation assets with a net zero pathway. Regarding nature, we suggested focusing on reducing environmental incidents and incorporating biodiversity considerations in construction project locations. Lastly, we raised concerns about potential share dilution from issuing shares without pre-emptive rights, as reflected in our voting record. SSE has been invited to discuss these issues further in an upcoming meeting.

TopBuild - Multi-thematic

Purpose:

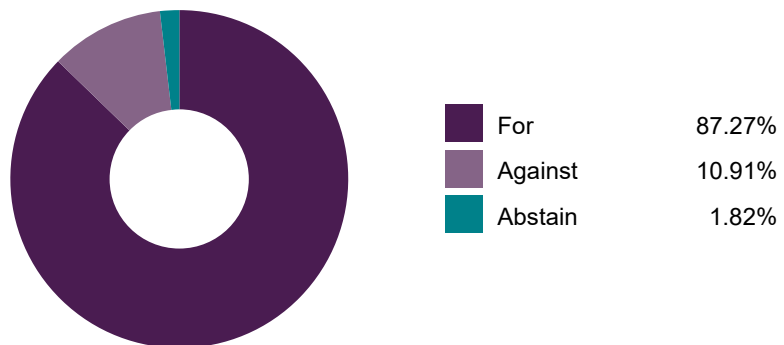

We reached out to TopBuild with a stewardship letter, highlighting the main sustainability concerns from our latest analysis. Our goal was to prioritise these issues and set up a meeting to discuss them further.

Outcome:

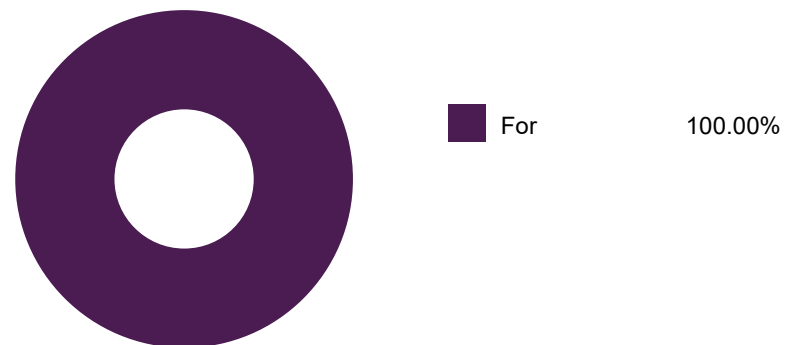

We encouraged TopBuild to enhance its disclosures, including metrics around Scope 2 emissions, waste generation, water consumption, and Carbon Disclosure Project (CDP) disclosure. Additionally, we urged the company to set targets in sustainability areas it considers material. We suggested that these targets could include elements of sustainability already focused on by the company, such as health and safety and fleet management. The outcome of this engagement is ongoing, with further discussions planned to ensure progress in these critical areas.

Fund Voting

Total proxy voting activity

Executive remuneration voting activity

Notable votes

Autodesk Inc

Adoption of Right to Call a Special Meeting - abstain: The company will introduce a 25% right which would be a significant improvement. However, given the shareholder proposal requesting that the Company adopt a 15% special meeting right, we are minded supporting a lower threshold instead.

Shareholder Proposal Regarding Right to Call Special Meeting - for: We are supportive of the proponent's request to adopt a 15% threshold for calling special meetings.

Market commentary

Market overview

Global equities were volatile during the third quarter amid heightened geopolitical tensions in the Middle East and ongoing inflationary pressures on the global economy. However, global equities have still posted gains on a year-to-date basis.

Markets continued to focus on central bank actions during the quarter, as both the Federal Reserve (Fed) and Bank of England (BoE) followed the European Central Bank in making the first rate cuts this cycle. This follows the significant rises through 2022 and 2023 as part of efforts to reduce inflation. Along with a significant stimulus package in China, this policy shift generally helped fixed income markets to perform positively over the quarter as yields fell to reflect lower central bank interest rates. After initial weakness, equity markets started to rise once more, reflecting the hope that the policy easing would result in a soft landing for the economy with the US S&P 500 index hitting an all-time high. Despite guidance from central banks that further cuts will be measured, markets are still pricing in material rate cuts over the next year or so.

During the third quarter, the MSCI ACWI Value Index gained 3.6% while the MSCI ACWI Growth Index lost 2.3%.

The price of WTI crude oil lost 12.1% over the quarter to \$70.1 a barrel, while copper futures meanwhile gained 2.1% in US dollar terms.

Outlook

Despite continued geopolitical uncertainty, concerns over the Chinese economy, worries of a US recession and a US presidential election in November, equity markets hit new all-time highs. While most market participants focus on the pace of interest rates cuts in the US and Europe, which should support future economic activity and reduce recession concerns, underlying company fundamentals are often overlooked. We currently observe high levels of innovation and investment in the global economy which are arguably unprecedented.

The physical world is seeing a huge amount of infrastructure investment, due to a need to support the digital world's expansion, tackle climate change through electrification, and bring back manufacturing to home countries (reshoring). The digital world continues to grow rapidly, as new technologies such as generative Artificial Intelligence (AI) are only just beginning to change the way we work. The natural world is also seeing huge potential to improve disease outcomes in areas such as cancer, Alzheimers and obesity.

Each of these areas, which can be described as atoms (physical world), bytes (digital) and genes (natural) will have a significant role to play in defining investment returns in the coming years and we believe the outlook for these remains very positive.

Risks and Warnings

Investment risk

The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Concentration risk

The price of Funds that invest in a reduced number of holdings, sectors, or geographical areas may be more heavily affected by events that influence the stockmarket and therefore more volatile.

EPM techniques risk

The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Exchange rate risk

Changes in currency exchange rates may affect the value of your investment.

Liquidity risk

In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Emerging markets risk

Investing in Emerging Markets may provide the potential for greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, currency fluctuations, the adverse effect of social, political and economic instability, weak supervisory structures and accounting standards.

Counterparty risk

The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Responsible investment risk

The Fund can only invest in holdings that demonstrate compliance with certain sustainable indicators or ESG characteristics. This reduces the number securities in which the Fund can invest and there may as a result be occasions where it forgoes more strongly performing investment opportunities, potentially underperforming non-sustainable funds.

Glossary

Carbon footprint

Exposure to high emitters in the portfolio, expressed in tCO₂e/\$M invested. Financed emissions are divided by the portfolio value, the same approach for listed companies and private issuers is applied in this metric.

ESG Integration

The consideration of environmental, social and governance (ESG) risk as part of the investment process. ESG integration does not mean the fund is trying to achieve a particular positive ESG outcome. Please check prospectus documentation for details on specific fund-level objectives.

Exclusions

Explicitly prohibits investing in a particular company, sector, business activity, country or region.

Financed emissions

The emissions from activities in the real economy that are financed through lending and investment portfolios, expressed in tCO₂e. Emissions are attributed to a portfolio based on the portion of the company's value the portfolio holds, and using different accounting values for public and private corporates. We provide financed emissions for scope 1 and 2 emissions.

Fund restrictions definitions

Adult Entertainment: Companies which own or produce adult entertainment services, or engage in the distribution or sale of adult entertainment services.

Alcohol: Companies which have involvement in brewing, distillation or sale of alcoholic drinks.

Animal Welfare: Companies that conduct animal testing (other than for purposes of human or animal health and/or where it is required by law or regulation).

Armaments: Companies who manufacture armaments or nuclear weapons or associated products.

Controversial Weapons: Weapons which have an indiscriminate and disproportional impact on civilians or weapons that are illegal and prohibited by international conventions and treaties.

Fossil Fuels: Companies involved in the exploration, extraction or refining of oil, or gas, or coal, plus any activity relating to thermal coal.

Gambling: Companies who promote irresponsible gambling which includes betting shops, casinos or amusement arcades.

High Environmental Impact: Companies which have a high environmental impact, and which have 'no evidence' of appropriate environmental management systems.

Human Rights Risks: Companies with a strategic presence operating in countries of concern and which have 'no evidence' of policies or systems to manage human rights risks.

Nuclear Power: Companies who generate energy from Nuclear Power.

Nuclear Weapons: Companies that manufacture, nuclear; or are involved in the production of intended-use parts, whole weapons systems, or exclusive delivery platforms.

Tobacco: Companies which are growing, processing or selling tobacco products.

Fund value

Total value of the fund as of the last business day of the calendar month. The fund value is as at close of business and on a mid-price basis.

Implied temperature rise (ITR)

ITR aims to measure the global warming outcome from the emissions trajectory of a company, if the whole economy followed the same trajectory.

Number of holdings

Total number of unique holdings of the Fund excluding cash, currency and derivatives.

Performance

Performance is calculated using the daily end of day NAV per share produced by HSBC based on the mid price.

Promotes environmental or social factors

An ESG Fund promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices.

Regional weights

Breakdown of holdings by country of risk relative to the benchmark index and grouped using RLAM's proprietary regional classification scheme.

SBTi

The Science-Based Targets initiative is a consortium of organisations that set up the definition and promotion of science-based target setting.

Glossary

Sector weights

Breakdown of holdings by FTSE ICB (Industry Classification Benchmark) sector relative to the benchmark index.

Sustainable fund objective

A product that has sustainable investment or a reduction in carbon emissions as its objective.

Top 10 holdings

Top 10 assets held by market value, excluding derivatives and cash.

Weighted Average Carbon Intensity (WACI)

Portfolio's exposure to carbon-intensive companies, expressed in tCO₂e / \$M revenue. Scope 1 and scope 2 GHG emissions are divided by companies revenues, then multiplied based on portfolio weights (the current value of the investment relative to the current portfolio value). The WACI is calculated as a weighted average sum of the holdings with carbon intensity coverage.
